### Deep Wallpaper

Mark Titmarsh

Deep Wallpaper is immediately visually engaging and seductive, images sound and video function as decoration for a mobile phone, but also have a subtle conceptual sting. The work explores the postage stamp effect in mobile phone imagery whereby condensed visuals of a certain design became more intense, and not less visible, because of their small size. Ultimately each of the video segments makes a journey from the photographic to the abstract.

---

### About the artist

Mark Titmarsh is a painter by training, with an active interest in film. His work won the Grand Prix at the 10th International Festival of Young Cinema, Montreal. He has also exhibited at: Mobile Content World; Artspace, Sydney; and Multimedia Arts Asia Pacific, Brisbane. Examples of his filmwork are held in The National Gallery of Australia, Cinemedia, and The National Film and Sound Archive.
